公司简介

本公司成立于2015年，专业研发，制造，销售不锈钢杯 壶自动化设备，公司有各项专利20余项，浙江省科技创新型企业，研发龙头企业，年产值5000万元，年研发各种专用高效节能型设备投资800万元，设备远销国内外，土耳其，印尼，马来西亚，印度，泰国，越南，国内知名企业等，远销广东，江苏，山东，安徽等各大型企业，有专业的技术服务和研发团队，设计理念极致人性化，超越时代思维设计，打造行业极致优异的智能自动化不锈钢杯 壶一体化自动生产线，一键启动无人生产线，为企业定制无人车间全套方案，为企业的发展保驾护航。

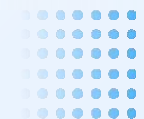

公司基本情况

BASIC INFORMATION OF THE COMPANY

Company Profile

Our company was established in 2015, specializing in the research and development and manufacturing of automatic equipment for stainless steel cups and kettles. We hold over 20 patents, are recognized as a provincial-level technological innovation enterprise in Zhejiang Province, and are a leading R&D enterprise. Our annual output value is 80 million yuan, and we invest 8 million yuan annually in the research and development of various specialized, efficient and energy-saving equipment. Our equipment is exported both domestically and internationally, including Turkey, Indonesia, Japan, Malaysia, India and Thailand. Vietnam, well-known domestic enterprises such as Shanghai Siled, Zhejiang Jiayi, and Hals, which are exported to large enterprises in Guangdong, Jiangsu, Shandong, Anhui and other places, have professional service and R&D teams. The design concept is extremely humanized, transcends the thinking of The Times, and creates the industry's most outstanding intelligent and automated stainless steel cup and kettle integrated automatic production line, with one-click start of unmanned production line.

Yongkang Hubang Machinery Technology Co., LTD

Company Qualifications

2024年

Develop intelligent integrated automation

2024年初启动研发极致优异的智能自动化不锈钢杯壶一体化自动生产线，5月份图形全部完成并采购完成，6月份完成组装和电控布局，8月份开始调试并完成部分优化，9月份完成调试并批量生产保温杯，10月测试完成。

In early 2024, we will start the research and development of an extremely excellent intelligent and automated integrated automatic production line for stainless steel cups and flasks. By May, all the graphics will be completed and the procurement will be finished. By June, the assembly and electrical control layout will be completed. By August, the debugging will begin and some modifications will be completed. By September, the debugging will

2025年

Develop one-click start automation

2025年4月启动研发一键启动机械手，5月份完成全部安装优化完成，6月份完成全部调试并投产，其最大优点是可以利用原有使用中的的设备，升级全自动化生产线，他不需要专业人员调试，普通工人都可以完成并一键启动。

The research and development of the one-click start manipulator was initiated in April 2025. All installation and optimization were completed in May, and all debugging was completed and put into production in June. Its greatest advantage is that it can utilize the existing equipment in use to upgrade the fully automated production line. It does not require professional personnel for debugging; ordinary workers can complete and start it with one click.

公司基本情况

BASIC INFORMATION OF THE COMPANY

企业荣誉 Enterprise honors

01

研发连续五年行业第一
The R&D has ranked first in the industry for five consecutive years

02

多年评为诚信单位
It has been rated as an honest unit for many years

03

多年评为创新单位
It has been rated as an innovative unit for many years

公司发展前景

DEVELOPMENT PROSPECTS

公司主要业务 01

不锈钢杯壶及配套自动化智能一体化自动线。Stainless steel cups and kettles and the corresponding automated and intelligent integrated automatic production line.

公司主要业务 02

不锈钢杯壶冷水循环测温机，恒温，冷水循环平台，避免口部传热。Stainless steel cup and kettle cold water circulation temperature measuring machine, constant temperature, cold water circulation platform, avoiding heat transfer at the mouth.

公司主要业务 03

多工位旋转抛光机，占地小，速度快，适合各种杯型。Multi-station rotary polishing machine, small footprint, high speed, suitable for various cup shapes.

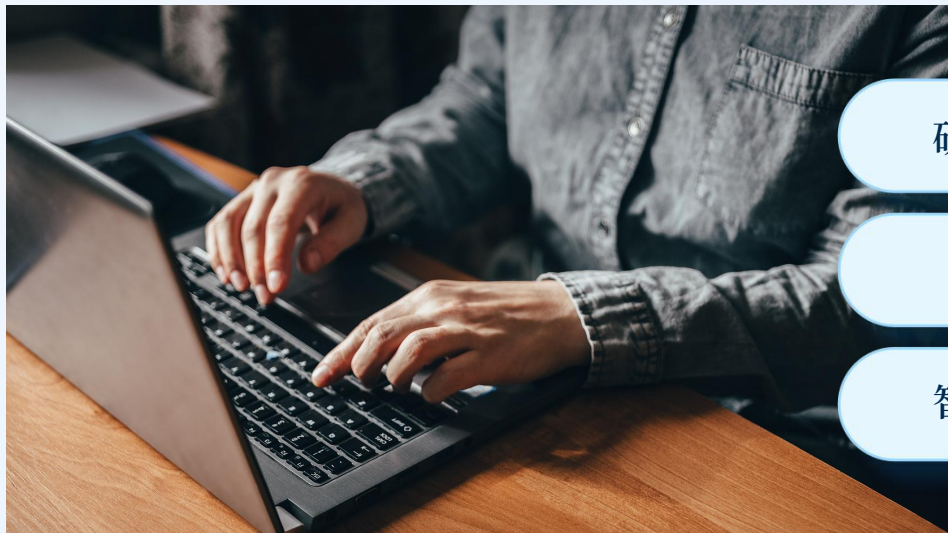

公司主要业务 04

利用在使用的设备改造一键启动自动生产线，节省成本完成自动化升级。Utilize the equipment in use to transform and start the automatic production line with one click, saving costs and completing the automation upgrade.

公司发展前景

DEVELOPMENT PROSPECTS

研发投入

抛光机

智能升级

40%

公司市场占比

杯壶智能改造自动化

01. 智能自动化生产线

研发一键启动机械手，5月份完成全部安装优化完成，6月份完成全部调试并投产，其最大优点是可以利用原有使用中的设备，升级全自动化生产线，他不需要专业人员调试，普通工人都可以完成并一键启动。

02. 多功能旋转抛光机

多工位组合一台完成保温杯（壶）的整条抛光生产线，节省了人工抛光同时也节省了占地的优势，从而降低生产成本，节能环保。

成功项目展示

SUCCESSFUL PROJECT PRESENTATION

成功项目一

智能自动化一体生产线

智能一体机的主要结合传统工艺，综合所以保温杯流程，从激光分杯，四工位缩口，激光割头，拉伸，整形，修边，螺纹，整口归纳在一台设备上，让其成为最小体积的自动化。

The intelligent all-in-one machine mainly combines traditional craftsmanship and integrates all the processes of the thermos cup, from laser cup separation, four-station mouth shrinking, laser head cutting, stretching, shaping, edge trimming, threading to the entire mouth, all in one device, making it the smallest volume of automation.

85%

节省耗能 面积

相比传统流水线，节省百分之八十五的面积，同时节省百分之八十五的电能。Compared with traditional assembly lines, it saves 85% of the area and 85% of the electricity.

85%

节省人工

传统流水线每台设备需要操作工一名，节省人工成本百分之八十五以上，节省人工的管理成本，节省机械对人体的伤害，辐射，工伤。Each piece of equipment in a traditional assembly line requires one operator, saving more than 85% of labor costs, reducing labor management costs, and minimizing the harm of machinery to the human body, radiation, and work-related injuries.

developed

专利证书
Patent
certificate

1. 高清摄像头检测焊道，精准定位，传输型号设备摇摆式定位砂焊缝。
2. The high-definition camera detects the weld bead, precisely locates it, and transmits the model equipment to swing and position the sand weld seam.
3. 口部精抛，镜光，砂光抛光。
4. Fine polishing of the mouth, mirror polishing, sanding and polishing.
5. 粗抛，使用砂带对杯身或者肩膀进行粗抛光。
6. Rough polishing: Use a abrasive belt to roughly polish the cup body or shoulder.
7. 对杯身或肩膀特需要求纤维轮抛光。
8. Fiber wheel polishing is specially required for the cup body or shoulder
9. 对杯身整体纤维轮抛光。
10. Polish the entire fiber wheel of the cup body
